

Bid Document - Oil Storage Tanks

Project: Crude Oil Storage Facility - Phase II

Background:

The client intends to expand crude oil storage capacity by constructing large API 650 compliant tanks with anti-corrosion lining and floating suction systems. Scope includes design, fabrication, erection, testing, and commissioning.

Vendor Quotes:

1. SteelBuild Engineering Contractors

- Specs: 3 x 50,000 KL, API 650 compliant, floating suction, corrosion protection coating.
- Delivery: 10 months.
- Price: \$15.2 Million USD.
- Warranty: 36 months.
- Value Add: Onsite construction management included.

2. MegaTank Industries

- Specs: 3 x 55,000 KL, API 650+, enhanced anti-leak lining and double insulation.
- Delivery: 12 months.
- Price: \$16.5 Million USD.
- Warranty: 48 months.
- Value Add: Advanced leak detection system.

3. OilStor Solutions Pvt. Ltd.

- Specs: 3 x 45,000 KL, double-layered bottom, economical design.
- Delivery: 8 months.
- Price: \$14.6 Million USD.
- Warranty: 24 months.
- Value Add: Shortest delivery timeline.

Evaluation Parameters: Tank design compliance, delivery, warranty, safety features, and total cost.
